# BLOOM BUDDY

Working from home has now become the new normal for most of us and technology has made it feasible. It is important to create a good work environment at home. Studies have proven time and again that gardens improve productivity and reduce stress.

Home gardens take on many forms, from a few plants in containers to large garden plots in the backyard. Looking after a quiet and tranquil garden improves productivity, reduces stress, releases fatigue and greatly improves your wellbeing.

Gardening is more than just a hobby, it is therapeutic as well. Home gardening can be especially helpful during these challenging times. In fact, taking *mycobacterium vaccae*, a type of beneficial bacteria that lives in soil, can increase levels of serotonin and reduce anxiety.

All that digging and planting does more than just making your home green. It also improves your cognitive senses and is also a fulfilling physical activity.

Let's not forget the benefits of eating what you're growing. If you have a vegetable, fruit or herb garden, you are getting fresh produce that you know has not been treated with chemicals.

### WHY BLOOMBUDDY?

- IMPROVED SOIL HEALTH** - Improves soil structure and increases water retention.
- SOIL TOO** - Your home and kitchen gardens.
- PROTECTS YOUR PLANTS** - With the natural microorganisms and nutrients for a faster and healthier growth.
- HEALTHY SOLUTION** - For a greener tomorrow.
- ENVIRONMENT** - Through natural research and scientific processes.

### AZOGRO

AZOGRO contains bacteria - Azotobacter sp. which fixes atmospheric nitrogen in the soil. It also produces biological molecules such as vitamins, protein, auxin, IAA, gibberellins that help in overall growth in the soil & shoot and root development.

**Dosage**  
Seed Treatment: 100 ml/box  
Seedling / Soil treatment: 500 ml / acre  
First application / Through Drip: 1000-2000 ml / acre, along with 200-400 kg of Azobin & 5 kg of Humus

**Packing Size** - 500 ml & 1 Ltr

  

### PHOSOL

PHOSOL contains active salts of Boron in which stabilizes the first phosphate in the soil and makes them available to the crop.

**Dosage**  
Seed Treatment: 100 ml/box  
Seedling / Soil treatment: 500 ml / acre  
First application / Through Drip: 1000-2000 ml / acre, along with 200-400 kg of Azobin & 5 kg of Humus

**Packing Size** - 500 ml & 1 Ltr

  

### POTAVIT

POTAVIT contains amino acid containing bacteria - *Frankia* sp. which mobilizes the elements potassium and phosphorus to supply a usable form.

**Dosage**  
Seed Treatment: 100 ml/box  
Seedling / Soil treatment: 500 ml / acre  
First application / Through Drip: 1000-2000 ml / acre, along with 200-400 kg of Azobin & 5 kg of Humus

**Packing Size** - 500 ml & 1 Ltr

### ORGANIC GROWTH BOOSTER

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

  

### ALL PURPOSE PLANT FEED

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

### POTTING MIXTURE

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

  

### COCOPEAT BLOCK

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

### VERMICOMPOST

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

  

### SEAWEED LIQUID FEED

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

### VERMICULITE

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

  

### PERLITE

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

### BIO DISEASE CONTROL

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

  

### BIO SOIL FUNGICIDE

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**

### NEEM CAKE POWDER

**ADVANTAGES**

- Increases plant growth and nutrient uptake
- Improves soil structure and water retention
- Increases resistance to diseases and pests
- Improves overall plant health and yield

**DOSEAGE**

Seed Treatment	100 ml/box	100 ml/box
Seedling / Soil	500 ml / acre	500 ml / acre
First application	1000-2000 ml / acre	1000-2000 ml / acre

**APPLICATION**
