- Quality focus on every responsibility
- Customer satisfaction
- Timely delivery to our customers
- Reliable quality selection
- Improving manufacturing processes
- Enhancing the competency skills of our employees through training and development

OUR ESTEEMED CLIENTS

PRE ENGINEERED BUILDING SYSTEMS

We manufacture custom L, J, beam foundations from MS12 - MS16 diameters to enable an application required. These bolts are provided in the same format for the projects. All bolts are manufactured in grades of MS, A304, or SS316.

Top nuts manufactured in different specifications, from 8 mm to 40 mm customer requirement. The configuration consists of a variety with flanking in both ways.

As these nuts are normally longer, Royal Anchors uses hex nuts along with a conical and ball nut with flange on each end. A cone is used to adjust between the nut bolts for this assembly, thereby giving the customer the assembly in optimum.

In steeling applications, these systems are offered to distribute load uniformly in the construction of industrial, retail and office buildings and other structures. Configuration consists of a variety of different sizes of support and structural steel members, in grades of MS12 to MS16 dia. (MS12 to MS16 dia.) for the various applications and structures that require high strength. Please visit our website on Royal Anchors: www.royalanchors.com to get more.

MATERIAL USED

- Foundation Bolts
- Top Nuts
- Ball Nuts
- Connectors
- MS Bolt Washers
- Connective Fasteners

PRE CAST CONCRETE STRUCTURES

The precast foundation is a reinforced concrete element consisting of vertical legs incorporated in a cast-in-place concrete column with foundation anchor bolts which serves as follows.

The precast foundation provides efficient design and construction to meet time, budget and a standard requirement.

MATERIAL USED
Foundation Bolts

INDUSTRIAL HEAVY DUTY FAN

We produce foundation bolts for wide fans, also known as industrial heavy duty fans and centrifugal fans. The applications are supported by light weight galvanized steel structures, which allow the transportation of the steel and concrete parts to the equipment foundation constructed by the support.

MATERIAL USED
Plate Washer Bolts

CRASH BARRIER

The crash barrier bolts are used to connect the precast concrete panels. These bolts are generally hot dip galvanized, the galvanized precast concrete reinforcement with spaced bars.

MATERIAL USED
Foundation Bolts

CONCRETE PLANTS

Reinforced in high strength sections of concrete structures designed especially for demanding, punishing and punishing working conditions. They provide the complete of strength to full load capacity for the plants as well as industrial plants. We use appropriate dimension grade used in the quality of concrete. Although quality standards are provided to IS: 456 and IS.

MATERIAL USED
Plate Washer Bolts

MATERIAL HASSELS CONVEYOR BELTS

We manufacture custom L, J, beam foundations for conveyor belt systems. These are used in Foundation in system in various sizes.

MATERIAL USED
Foundation Bolts

STRUCTURAL HOARDINGS

Foundation bolts, also known as anchor bolts or base bolts, are essential structural components to support structural construction.

MATERIAL USED
Foundation Bolts
